

A Data-Driven Approach to Student Wellness

Aura Bot identifies the emotional needs of students through safe, private AI conversations, providing schools with the anonymous insights needed for effective, proactive support.

How It Works

How It Works

1. Chat Privately

Students engage in supportive conversations with Aura Bot anytime, anywhere.

2. Gain Insights

Anonymized data provides schools with macro-level wellness trends, never individual chats.

3. Foster Support

Early alerts empower educators to provide timely and effective support.

An Ecosystem of Care

For Students

A safe space to explore feelings, with access to curated wellness resources.

For Parents

Understand your child's emotional trends and get helpful conversation starters.

For Schools

A powerful dashboard to monitor student wellbeing and implement data-driven initiatives.

Our Mission

We believe that every student deserves to be understood and supported. Our mission is to leverage technology not just for academic achievement, but for emotional wellbeing, creating healthier and more empathetic school communities. We are a team of educators, technologists, and mental health advocates dedicated to this cause.
